Pipette Tips Blue

Description:

Engineered for accuracy and reliability, Blue Pipette Tips (200–1000 µL) provide consistent performance across a wide range of laboratory applications. Their robust construction ensures resistance to harsh chemicals and extreme temperatures, making them ideal for both storage and experimental use. Designed for convenience and precision, these tips enhance workflow efficiency in modern laboratories.

Key Features:

- **Durable, chemical-resistant polypropylene material**
- **Temperature resistant from -196°C to 121°C**
- **Compatible with standard laboratory pipettes**
- **Secure fitting design to prevent leakage**
- **Ideal for large volume liquid handling**
- **Suitable for freezer and autoclave use**
- **High accuracy and reproducibility**
- **Smooth inner surface for better dispensing**
- **Easy-to-use and reliable performance**
- **Lab-grade quality for professional use**
