Pipette Tips Yellow

Description:

Yellow Pipette Tips (10–200 µL) are built for precision and efficiency in small-volume liquid handling. Their high-quality construction ensures durability under demanding laboratory conditions, while their ergonomic design enhances ease of use. Perfect for research, diagnostics, and routine lab work, these tips deliver reliable and repeatable results every time.

Key Features:

- **High-quality polypropylene construction**
- **Temperature resistance from -196°C to 121°C**
- **Designed for small volume precision (10–200 µL)**
- **Secure and leak-free fitting**
- **Chemical-resistant for lab use**
- **Compatible with most micropipettes**
- **Smooth surface for accurate dispensing**
- **Ideal for research and diagnostic labs**
- **Easy sample handling and identification**
- **Reliable and consistent performance**
